Amábile Zucchetti

Full Stack Developer

amabilezucchetti@proton.me   www.linkedin.com/in/amabilezucchetti

Full Stack Developer with a strong emphasis on front-end development and expertise in crafting intuitive, responsive, and user-friendly interfaces using **ReactJS**, **JavaScript**, **HTML5**, and **CSS3**. Proficient in **Node.js** and building **RESTful APIs** to support seamless integration. Continuously learning new technologies to stay ahead and adapt to evolving project needs.

SKILLS

- Front-End: ReactJS, SCSS, JavaScript, JQuery
- Back-End: Node.js, Express, RESTful APIs, MySQL, Sequelize
- Tools: Git, Vite, Docker, Swagger, Insomnia

PROFESSIONAL EXPERIENCE

Software Developer II

Turing Technology Factory - UniEVANGELICA   2023 - Present
- Led the development and design of software applications, focusing on user experience and intuitive interfaces, ensuring seamless project delivery.
- Engaged in full-stack development, contributing to both front-end and back-end, ensuring end-to-end functionality.
- Delivered high-quality software solutions across multiple projects, demonstrating expertise in problem-solving and continuous learning.
- Key Projects:
- Dental Management System (Sterilization Clinic): Developed a management system for optimizing material tracking, enhancing clinic operations, and ensuring improved mobile accessibility and validation processes.
- Therapy Consultation Management System: Created a scheduling and management platform, integrating calendar views, search functionalities, attendance tracking, and report generation to improve session management in academic settings.

Software Developer I

Brazilian Air Force - BAAN   Feb 2024 - Oct 2024
- Contributed to the design and development of internal software solutions, focused on operational efficiency and security.
- Collaborated with cross-functional teams to ensure successful project execution and optimal system performance.
- Key Projects:
- Access Control System: Designed and developed a system for managing entry and exit of people and vehicles, including tracking badge issuance and facilitating data-driven decision-making.

Software Tester - Apprentice

onBlox Logistics Software   2020 - 2021
- Ensured software quality through comprehensive testing, identifying defects and ensuring the reliability of products before release.
- Worked closely with development teams to improve software functionality, utilizing Jira for bug reporting and Agile practices for enhanced project management.

EDUCATION

Bachelor in Software Engineering

Universidade Evangélica de Goiás   2023 - 2026 (Expected)
